IMPORTANT BEST PRACTICES INFORMATION

In order to ensure the proper communications between coaches and from coaches to players it is very important to make sure that settings and placement of the headset microphone are optimum. As a reminder, below is some important information regarding best practices when using your headset microphone

Headset Microphone Gain BeltPack Setting

If you have legacy SmartBoom SBP-151/152 headsets with your X-System, CoachComm recommends you raise the mic gain in the beltpack you are connecting to the current SBP-191/192 model headset to a setting of "6".

SBP 191/192

Beltpacks with the SBP-151/152 attached should have their mic gains set to "3".

SBP 151/152

Headset Microphone Position

For best performance, it is recommended the microphone be positioned directly in front of your mouth, sitting a finger's width from your lips.

Correct Mic Position

Incorrect Mic Position
